## **16.402-4 Structuring multiple-incentive contracts.**

A properly structured multiple-incentive arrangement should-

(a) Motivate the contractor to strive for outstanding results in all incentive areas; and

(b) Compel trade-off decisions among the incentive areas, consistent with the Government's overall objectives for the *acquisition*. Because of the interdependency of the Government's cost, the technical performance, and the delivery goals, a contract that emphasizes only one of the goals *may* jeopardize control over the others. Because outstanding results *may* not be attainable for each of the incentive areas, all multiple-incentive contracts *must* include a cost incentive (or constraint) that operates to preclude rewarding a contractor for superior technical performance or delivery results when the cost of those results outweighs their value to the Government.
