

45.600 Scope of subpart.

This subpart establishes policies and procedures for the reporting, reutilization, and disposal of contractor inventory excess to contracts and of property that forms the basis of a *claim* against the Government (*e.g., termination inventory* under fixed-price contracts). This subpart does not apply to the disposal of real property or to property for which the Government has a lien or title solely as a result of advance, progress, or performance-based payments that have been liquidated.
