47.301-1 Responsibilities of contracting officers.

- (a) Contracting officers shall obtain from traffic management offices transportation factors required for-
- (1) Solicitations and awards; and
- (2) Contract administration, modification, and termination, including the movement of property by the Government to and from contractors' plants.
- (b) *Contracting officers shall* request transportation office participation especially before making an initial *acquisition* of *supplies* that are unusually large, heavy, high, wide, or long; have sensitive or dangerous characteristics; or lend themselves to containerized movements from the source. In determining total transportation charges, *contracting officers shall* also consider additional costs arising from factors such as the use of special equipment, excess blocking and bracing material, or circuitous routing.
