If specific tests of the samples' performance are made by the Government, the offeror will be furnished the results of such tests prior to a contract being entered into. The surplus material to be furnished must meet the requirements of the current contract or order, whether or not the material met Government requirements in existence at the time the material was initially manufactured or sold to the Government. If higher-level contract quality requirements apply to the material being acquired, those requirements do not apply to surplus material furnished under this contract.

(b)(1) All offers for unused former Government surplus property will be evaluated and a \$200 evaluation factor shall be applied. If the contracting officer requires technical assistance or the item is a CSI, they shall send a pre-award referral to the product specialist.

11.391 Part numbered items.

(a) Offers for part numbered items may be other than exactly stated in the PID due to a variety of reasons such as administrative changes, engineering changes, reverse engineering, obsolescence or manufacturing enhancements. (i) If offered item(s) are not in stock or not yet manufactured a copy of an original quotation from the approved source to the offeror identifying exact item cited in item description and a quantity sufficient to satisfy the solicitation requirement.

(2) If the alternate product is a reverse-engineered product, the offeror shall provide: technical documentation to establish that the offered item represents the exact item specified in the item description (i.e., invoice from an approved source or submission of samples having markings of an approved source); number of samples that were examined; the process/logic used; raw data (measurements, lab reports, test results) used to prepare drawings or specifications for the offered item; any additional evidence that indicates the reverse-engineered item will function properly in the end item; and any evidence that life cycle/reliability considerations have been analyzed.

(j) Evaluation of Alternate Offers.

If the solicitation does not provide for evaluation of alternate offers for the current procurement, the offeror may submit a request for evaluation of the alternate product's technical acceptability for future procurements of the same item. The request for evaluation shall cite the national stock number (NSN) of the exact product and include the applicable level of technical data. The level of technical data that the Government has available for use to evaluate the acceptability of an alternate product offered, and the corresponding level of technical data that must be furnished with an offer of alternate product, will be identified in the item description and/or via correspondence with the appropriate location below.

M06 Evaluation of Offers of Alternate Product for Part Numbered Items (SEP 2016)

Offers of alternate product will not be evaluated for the contract action if:

- (1) The solicitation is automated;
- (2) It does not meet the dollar threshold for savings, after an evaluation factor of \$600 is applied for coordination with each ESA; or
- (3) When the time proposed for award does not permit evaluation, and delay of award would adversely affect the Government.

11.392 Traceability documentation.

It is critically important for contracting officers to be able to confirm a documentation trail from the supplier to the approved manufacturer. Contractors are required to make available and retain traceability documentation (see [4.703](#)). Contracting officers shall request unredacted traceability documentation when there are potential indicators of risk such as:

Preaward traceability:

- (i) The supplier has no past DLA history;
- (ii) The price offered is lower than price of approved source or its authorized distributor;
- (iii) The price offered is out of line with other quotes or past pricing history;
- (iv) The price offered for new product is lower than price offered for surplus material;
- (v) The manufacturer's Contractor and Government Entity (CAGE) code identified in offer differs from CAGE code of approved manufacturing source in solicitation;
- (vi) The offeror/contractor is reluctant or unable to provide traceability documentation;
- (vii) The offeror's/contractor's phone number, address, email, or other vital information is missing, invalid, or suspicious;
- (viii) The contractor invoices without delivering the supplies;
- (ix) Contractor is on the DCRL for traceability concerns.

Examples of acceptable preaward traceability documentation are found at the [Counterfeit Detection and Avoidance Program \(CDAP\)](#) website (<http://www.dla.mil/LandandMaritime/Business/Selling/Counterfeit-Detection-Avoidance-Program/>).

Postaward traceability.

- (i) If preaward traceability was required or when other circumstances are warranted;

(ii) Independent distributors and brokers that do not keep inventory and procure the offered product after contract award. The postaward documentation demonstrates the complete line of ownership before the product is shipped.

(iii) Protest is received questioning awardee's ability or intention to supply exact product. The contracting officer shall immediately request traceability documentation.

(iv) The contractor requests a modification changing the part number or other information related to its exact product representation.

(v) The contractor is on the DCRL for traceability concerns.

If the awardee does not have full traceability information, the contracting officer shall contact the product specialist to recommend that product verification testing be invoked using procurement note E05 (see 46.292).

The contracting officer determines the acceptability of traceability documentation and may request additional documentation necessary to support acceptability. When reviewing traceability documentation, special attention should be given to:

(i) The letterhead is correct and/or unaltered;

(ii) Signatures are legible and provided by authorized personnel;

(iii) There is no evidence of alteration, such as cutting and pasting/white out/scanning;

(iv) There are no missing documents;

(v) Dates are current;

(vi) Phone numbers are accurate;

(vii) Font styles are consistent;

(viii) There are no handwritten annotations on a typed document;

(ix) Line items reflect correct part numbers and quantities;

(x) Documents do not appear to have been reproduced repeatedly;

(xi) Documents do not have shaded areas, which may indicate information was covered up and the document recopied;

(xii) Correct division of manufacturing source is cited; or

(xiii) There are no disclaimers in the document (e.g., stating parts cannot be traced to the actual manufacturer or to any specific revision of the part, etc.).

If the offeror fails to provide sufficient information preaward within the time frame requested, the contracting officer shall consider the offer technically unacceptable and proceed to the next acceptable offer.

If the contractor fails to provide sufficient information postaward within the time frame requested, the award may be cancelled. If it is not in the Government's best interest to cancel the award, the

contracting officer may contact the product specialist to recommend that product verification testing be invoked using procurement note E05 (see 46.292).

The contracting officer shall reject redacted traceability documentation and notify the offeror or contractor. In all cases, any traceability documentation provided by offerors or contractors shall be treated as proprietary information and stamped accordingly.
