

## 4.2 Electronic Source Selection

EZ Source is the standard Air Force documentation tool that shall be used for all unclassified competitive acquisitions valued at \$100M or more (unless waived by the CAA), or when an acquisition has been designated a high visibility program by a PEO or Center/Complex/Wing Commander. EZ Source may be used for acquisitions valued at less than \$100M. In order to ensure proper support is available to the team, PCOs must use the [SharePoint EZ Scheduler](#) to request the use of EZ Source and input information relative to their acquisition not later than 60 days prior to the projected RFP release.
